TECHNICAL SKILLS

JavaScript
TypeScript
HTML5
CSS3
React.js
Next.js
Node.js
Express.js
NestJS
MongoDB
PostgreSQL
REST APIs
Git
Full-Stack Web Development
SaaS Product Development
Problem Solving
Independent Learning
Adaptability
Client Communication

PROFESSIONAL SUMMARY

Hands-on Full-Stack Developer building web applications and SaaS products using JavaScript, TypeScript, React.js, Next.js, NestJS, Express.js, MongoDB, and PostgreSQL. Experienced across frontend and backend development, REST APIs, database integration, deployment, and full-stack feature delivery through independent projects including ZKFitness and JerseyGarage. Strong problem-solving, adaptability, independent learning, and client communication skills.

PROJECTS

ZKFitness — Gym Management SaaS

2026 | Role: Sole developer | Status: Fully built, deployed, and maintained.

GitHub: github.com/zaskampany/zk-fitness

- Built a full gym management SaaS covering member, operations, and workflow management.
- Developed the frontend in Next.js and backend services in NestJS, owning the full feature flow end to end.
- Implemented PostgreSQL-based data handling for structured storage, retrieval, and application consistency.
- Handled UI, API, and database integration to deliver the complete product as a working full-stack application.
- Set up deployment and CI/CD for reliable delivery and maintenance.

JerseyGarage — E-commerce Platform

2026 | Role: Sole developer | Status: Fully built, deployed, and maintained.

GitHub: github.com/Sinan-TK/jerseygarage

- Built an e-commerce web application for product browsing and management workflows.
- Developed backend APIs and application logic in Express.js, owning the core server-side implementation.
- Used MongoDB for application data storage and retrieval across the product workflow.
- Managed backend structure and data flow to support the full e-commerce feature set.
- Set up deployment and CI/CD for reliable delivery and maintenance.

PROFESSIONAL EXPERIENCE

Freelance Full-Stack Developer at Freelance

Freelance full-stack developer delivering client web applications and project builds using React.js, Next.js, NestJS, Express.js, MongoDB, PostgreSQL, JavaScript, and TypeScript.

- Delivered end-to-end features for ZKFitness and JerseyGarage, translating client requirements into working web applications.
- Implemented responsive frontend interfaces in React.js and Next.js, building reusable components and user flows aligned with project goals.
- Built and connected REST APIs with NestJS and Express.js, handling application logic and backend integration across project modules.
- Designed data handling with MongoDB and PostgreSQL to support structured storage, retrieval, and cross-layer application functionality.
- Researched tools and technologies independently to keep projects moving from development to delivery.

EDUCATION

Bachelor of Computer Applications (BCA), Jain University

2028 | Expected graduation: Aug 2028

Certificate in MERN Stack Development Program, Brototype

2026 | Completed: 25 Jul 2026

MongoDB, Express.js, React.js, Node.js, Full-Stack Web Development

Higher Secondary Education, Govt Higher Secondary Boys School, Manjeri

Computer Science
